

Roster Composition on NBA Team Performance

- Compares the average years of experience for teams that made the playoffs (True) and those that did not (False).
- Teams that made the playoffs tend to have a higher average experience level.
- Data points represent the average years of experience for each team category.

Experience vs. Playoff Appearances

Experience vs. Team Performance Metrics

- This scatter plot shows the relationship between average team experience and a performance metric.
- Each point represents an NBA team, with its position indicating its average experience and the chosen performance metric.
- The plot may suggest a trend where teams with more experience perform better
